Ancestors: In Search of Human Origins. Our earliest ancestors left the trees to walk on two legs at least four million years ago as part of a unique sexual strategy. Our. Our earliest ancestors left the trees to walk on two legs at least four million years ago as part of a unique sexual strategy. Our first large-brained ancestors survived as scavengers, competing with lions and hyenas for food, rather than being the noble hunters of popular imagination.

graptolites). An archaic survivor from this stage is the acorn worm , sporting a circulatory system with a heart that also functions as a kidney .

Timeline of human evolution - Wikipedia

The primary resource for detailing the path of human evolution will always be fossil specimens. Certainly, the trove of fossils from Africa and Eurasia indicates that, unlike today, more than one species of our family has lived at the same time for most of human history.

human evolution | Stages & Timeline | Britannica

The book does a good job of introducing human ancestors, starting with Lucy - the female Australopithecus afarensis, that launched Dr. Johanson's career and fame. Perhaps what the book does best, is introduce the study of paleoanthropology and archeology by presenting both sides of topics.

Amazon.com: Customer reviews: Ancestors: In Search of

...

The search for human ancestors and origins made great strides in the second half of the twentieth century. During the nineteenth and early twentieth century few actual fossils were known, it was thought that there were only a few types of archaic (early) people, and the age of those fossils was in dispute.

Ancestors: The Humankind Odyssey is a third-person open world action-adventure survival game series by Panache Digital Games and acclaimed game designer Patrice Desilets.

Ancestors: The Humankind Odyssey Wiki Guide - IGN

The world's most famous human ancestor is probably the 3.5-million-year-old nicknamed "Lucy." She was an Australopithecus afarensis, which means "southern ape," who lived in eastern and southern Africa. This area was open grassland where giraffes, elephants, rhinoceroses, antelopes, and buffalo roamed the landscape.
