*Centaurea cyanus*, commonly known as cornflower or bachelor's button, is an annual flowering plant in the family Asteraceae, native to Europe. In the past it often grew as a weed in cornfields (in the broad sense of "corn", referring to grains, such as wheat, barley, rye, or oats), hence its name. It is now endangered in its native habitat by agricultural intensification, particularly over-use of ...

The healthiest CBD flower grows naturally — as Mother Nature intended — without the addition of damaging fertilizers, harsh chemicals, or pesticides. Unfortunately, many growers resort to these methods in an effort to get the largest crop possible. But just because it's a large crop doesn't mean that the flowers themselves are good quality.
