The agroecological approach does just this because it is more sensitive to the complexities of local agriculture, and has a broad performance criteria which includes properties of ecological sustainability, food security, economic viability, resource conservation and social equity, as well as increased production.

Agroecology | Agroecology Land Trust

Agroecology is a holistic approach that foster to reconcile agriculture and local communities with natural processes for the common benefit of nature and livelihoods. Agroecology is inherently multidisciplinary, including sciences such as agronomy, ecology, environmental science, sociology, economics, history and others.

Agroecology - Wikipedia

We continue to strive towards complete self-sufficiency, and at times we are very close. Whether that is a closed flock of sheep, home-grown forage, water harvesting, energy generation, or owning the entire value chain; our ongoing goal is to prove that an environmentally and socially sustainable farming system is viable.
