Getting boiled alive is a tough way to go, but that is the preferred method for cooking lobster. Cooks typically hear what sounds like a scream when the lobster hits boiling water. But lobsters have no vocal chords or throats. That sound you hear isn't screaming. It's the sound of air, expanding as it heats, rushing from the lobster's body.

### **Do Lobsters Make Noise When Being Cooked? | Our Everyday Life**

It is a myth that lobsters scream when you put them in boiling water as lobsters don't have vocal cords. Any hissing sound you hear is likely air escaping the lobster's body/shell as part of the cooking process. It can also be argued that lobsters don't feel pain because they have no brain and only a very simple nervous system.
