Evidently consciousness does not depend on the brain. The brain is the receiver of consciousness, not the source of consciousness. These studies represent scientific evidence for the existence of consciousness independent of the brain, otherwise known as the soul. Post by Spiritual Intelligence.

The Neuroscience of Spiritual Intelligence

The neuroscience of religion, also known as neurotheology and as spiritual neuroscience, attempts to explain religious experience and behaviour in neuroscientific terms. It is the study of correlations of neural phenomena with subjective experiences of spirituality and hypotheses to explain these phenomena. This contrasts with the psychology of religion which studies mental, rather than neural, states. Proponents of the neuroscience of religion say there is a neurological and evolutionary basis
