(True or False) -Study the legend at the upper left or lower right of the SC001 Chart. What type of object is located at RA = 5h 35m ; Dec = +20° 01' ? -What telescopic double star (two stars which orbit each other relatively closely) is located at RA = 12h 56m 02s; DEC = +38° 19' 07"? What constellation is it in?

[Solved] hould you face while using the SC-001 star map to ...

From Star Chart To Sky The next step in using a star chart is to match what you see on the map with what you see in the sky. Begin with the constellation, and then identify the very brightest of the stars you see around your designated target and locate that pattern in the sky.

How Do I Read a Star Chart? | Orion Telescopes: Articles

The SC001 covers about 85% of the celestial sphere. It includes stars we can't see from CSB/SJU (those with dec more negative than -45°) and it doesn't show some stars we can see (stars close to the north celestial pole, with dec larger than the 60° maximum of the map). Stars with dec larger than 45° are always above the horizon.

SC001: p. 9

On the SC001 Constellation Chart, the right ascension axis spans the width of the chart and runs from 0 to 24 hours. The declination axis spans the height of the chart and runs from -60° to +60° (if the more polar regions were included on the chart, it would run from -90° to +90°). 1.
