The Tempstar TVH8 heat pump is the brand's variable-capacity model with a compressor that modulates between 40% and 100% of capacity. It delivers quiet, precise and efficient heating and cooling; Other Deluxe Series models are Tempstar two-stage heat pumps that run on low most of the time for quieter, longer cycles. These produce

The evaporator coil is the same model # on both suggested units, however I was given two different model #'s for the compressors. Which model do you think is the best choice? Both are in the Carrier comfort series, 14 seer rating. Carrier model # 24 ABC 630 or Carrier model # 24 ACC430A003. Would appreciate any advice at this point.
