Define, Measure, Analyze, Improve, Control, or DMAIC – is known for its ability to eliminate problems resulting from variability in manufacturing, engineering and transactional processes. There will be those times, though, when no improvement will enable an existing process to meet customer expectations.

slight difference in what you measure and what and how you analyze. Finally, D & V stand for Design and Validate/Verify, respectively, clearly indicating that a Process Design is undertaken to meet Six Sigma levels of Performance. Hence, DMADV is alternatively also called as DFSS (Design for Six Sigma).
